Objective: To get a hands-on Java JEE developer position in a long term Full Stack based project.

Total work Experience 3 Year 2 months

Year from	Year to	Designation	Company	Domain
May 2024	Present	Backend Developer	WSI	Fintech
Oct 2023	May 2024	Java Developer	LogicSoft International beyond hype	FCI
Feb 2022	July 2023	Java Developer	Eliphus Technologies	Ecom

Profile in a Glance:

- Have 3 year 2 months of working experience.
- Have demonstrated good skills in all phases of project life cycle resulting in customer satisfaction.
- Have contributed in multiple roles like **Integration Developer for Frontend**, Java Developer
- Application Development and Performance Tuning on Microservices based apps
- Qualified **B.Tech** computer Science engineer.

Technologies Stack:

UI Technologies	HTML5, Thymeleaf, JSP, CSS, Java Script, Dreamweaver, Angular , Typescript
Back End	Java JEE, Servlet, Spring, Spring Boot , Hibernate, JPA, Rest API
Microservices	Spring Boot, Consul, Eureka, Docker, Kubernetes, Hystrix, Helm
AWS Cloud	EC2, RDS, IAM, S3, Redis
Web Services	Rest API (Microservices)
Service Debugger	Postman, Swagger.
Web Servers	Tomcat.
Databases	MySql, Oracle, PostgreSQL,
Other Tools	Kafka, Docker, Kubernetes, Junit
Version Control	Gitlab
IDE used	IntelliJ, Eclipse, VS Code, STS.
Design Pattern	Observer observable, Singleton, Composite, MVC.

PROFESSIONAL QUALIFICATION

Course	Uni./Institution	Year of Passing
12 th	CBSE	2016
BE	MDU Rohtak	2020

(Somdutt Sharma)

JOB PROFILE at WSI Noida

1. Project Details:

Project:	Fintech
Environment	Micro services, Java JEE, Spring Boot, AWS, Kafka, Swagger, Spring Cloud
Back-end Tool	Java8, Swagger, Actuator
Role	Software Developer
Duration	9 Months
Team Size	7 Developers

Project Description

*Worked on Fintech application which is microservice based banking solution developed using Spring boot.

* It allows users to manage their accounts ,apply for different types of loans and access card services. Each services is design independently as an ensure scalability, maintainability. Independently deployed Accounts ,Cards and Loans service and Containerized deployment for each microservice

Roles and Responsibility: **Rest API Developer - Microservices :**

- Deciding input & output variables for Rest API and implementing using Spring boot
- Working major on security using spring security and jwt & delivering production ready code on time.
- Deploying code changes to higher environment and verifying & debugging code changes.

JOB PROFILE Logicsoft International Beyond hype pvt ltd Gurugram.

Project Details:

Project:	FCI (Food Corporation of India)
Environment	Micro services, Consul, Spring Boot, ELK, AWS, Kafka, Swagger.
Back-end Tool	Oracle
Front-end Tool	Angular 4.0
Role	Software Developer
Client	Central Government of India
Duration	5 Months
Team Size	7 Developers

Project Description

QMS is an online software system for monitoring the grain samples collected physical and chemical analysis performed on the grain samples and publishing the test result of high grain samples. This Portal was developed for sample collection and made user creation module. Implemented Reporting module in which user can track search samples and can check pendency of samples. Dashboard was created for different types of users of <http://qms.digital.logicsoft.online>

Roles and Responsibility: **Rest API Developer - Microservices :**

- Checking in code to Gitlab & making code changes using Java JEE, Spring boot
(Somdutt Sharma)

- Writing Junit test cases after code changes & delivering production ready code on time.
- Ensuring & verifying code changes using postman and swagger for higher environment.

PERSONAL DETAILS

Name	Somdutt Sharma
Corres. Address	Khambi Palwal
Strength	Excellent Technical Knowledge and sincere towards work.
Weakness	Can not say No to any assignment without putting efforts.

JOB PROFILE at Eliphus Technologies New Delhi

1. Project Details:

Project:	OCW (Ocean Whole Mart)
Environment	Micro services, Java JEE, Spring Boot, ELK, AWS, Kafka, Swagger.
Back-end Tool	Java8, Swagger
Role	Software Developer
Duration	11 Months
Team Size	7 Developers

Project Description

This is a project rewritten in microservices based concepts. Existing monolithic application to be re written in microservices for AWS cloud. Ocean Whole Mart is a B2B Ecommerce Product where this application act as bridge between shopkeeper and whole seller. OCW created and implemented using Restful API's that allows the seamless communication between different microservices, these api facilitated data exchange between shopkeeper with their address and Pincode which are distributed location wise.

Roles and Responsibility: **Rest API Developer - Microservices :**

- Deciding input & output variables for Rest API and implementing using Spring boot
- Writing Junit test cases after code changes & delivering production ready code on time.
- Deploying code changes to higher environment and verifying & debugging code changes.
